

SHAHID IQBAL

Flutter Developer | Mobile Application Engineer
Pakistan • +92 341 1099735 • info.shahidiqbal7@gmail.com

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience developing and maintaining cross-platform mobile applications for iOS and Android. Experienced in building scalable, user-friendly, and high-performance apps with clean UI implementation, API integration, and efficient app architecture. Strong team collaborator with the ability to adapt quickly and deliver quality solutions in fast-paced development environments.

KEY SKILLS

Mobile Development

Flutter & Dart (2+ yrs.) • Android App Deployment (Google Play Console) • iOS App Deployment (App Store Connect & TestFlight) • Async Dart (Futures, Streams, async/await, Isolates) • Custom Widgets & Adaptive Layouts

Architecture & State Management

Clean Architecture • MVVM / MVC • Provider • Riverpod • GetX

Backend & Integrations

RESTful API Integration • OAuth2 / JWT Auth Flows • Firebase (Auth, Firestore, FCM) • WebSocket • Google Maps SDK • Stripe • Push Notifications

Storage, Tooling & DevOps

Hive • Shared Preferences • SQLite • Git / GitHub • AI-Assisted Dev (Claude, Cursor) • Performance Profiling & Optimization

WORK EXPERIENCE

Flutter Developer | 14K Business Solution LLC

2023 – Present

- Designed, built, and maintained production-grade Flutter apps for iOS and Android, applying MVVM/Clean Architecture to ensure long-term maintainability.
- Led REST API integration and third-party SDK onboarding (Firebase, Stripe, Google Maps), enabling seamless data exchange and expanding app functionality.
- Diagnosed and resolved performance bottlenecks improved startup time and rendering smoothness for live-user products by profiling memory allocation and widget trees.
- Managed full App Store and Play Store release cycles: app signing, store listings, release notes, and review process compliance.
- Conducted code reviews and contributed to team-wide development best practices, measurably raising code quality and reducing regression rates.
- Collaborated cross-functionally with designers, PMs, and backend engineers to ship features on schedule and iterate based on user analytics.

Flutter Stack Developer | Appalo Inc

2024 – Apr 2026

- Engineered a real-time live-location tracking app using Google Maps SDK and WebSocket, applying Clean Architecture and feature-based module organization to keep the codebase scalable.
- Integrated multiple REST APIs with JWT-based auth flows, including token refresh logic, error handling, and offline-first behavior using Hive for local caching.
- Optimized app performance through Dart DevTools profiling reduced frame drops by refactoring widget rebuild logic and moving heavy tasks to isolates.
- Integrated push notifications (FCM), camera, and location services via platform channels, coordinating with native Android/iOS constraints.
- Participated actively in code reviews with senior engineers; flagged blockers early and maintained consistent delivery velocity in an async-first remote workflow.
- Adopted AI-assisted development tools (Claude, GitHub Copilot) to accelerate feature delivery while maintaining engineering rigour and code quality standards.

Flutter Intern | Pixel Io Technologies

May 2023 – Oct 2023

- Built location-based features using Google Maps SDK and REST APIs; contributed to design and implementation of user-facing UI components.
- Developed reusable widget library and practiced state management patterns (Provider) under senior developer guidance.

Flutter Intern | Urraan by Codematics Inc.

Mar 2023 – Apr 2023

- Completed intensive Flutter training; built foundational apps covering UI implementation, async Dart, and core debugging techniques.

PUBLISHED PROJECTS

14k Workspace — CRM Application — Web & Mobile (iOS & Android)

- Enterprise-grade Flutter CRM featuring project & task management, KPI dashboards, departmental workflows, and recurring task automation. Built with GetX state management and Clean Architecture, ensuring scalable and maintainable architecture across responsive web and mobile platforms.

Published on:

- Google Play: <https://play.google.com/store/apps/details?id=com.app.workspace14k>
- App Store: In progress / Not yet published

Al-Sham — Restaurant Management App — Web & Mobile (iOS & Android)

- Role-based management platform (Admin, Manager, Assistant Manager) covering inventory, employee management, and daily operations. Full end-to-end deployment experience including app signing, store listing, and review approval.

Published on:

- Google Play: https://play.google.com/store/apps/details?id=com.al_sham.restaurants
- App Store: <https://apps.apple.com/pk/app/al-sham-restaurant-management/id6482979587>

Bankruptcy — Business Assessment Platform — iOS & Android

- Flutter-based business assessment platform that enables small and medium-sized businesses to evaluate operational and financial health through structured assessments. Features advanced business analytics, automated scoring mechanisms, AI-powered insights, and personalized recommendations to support strategic planning and informed decision-making.

Published on:

- Google Play: <https://play.google.com/store/apps/details?id=com.app.bankruptcy>
- App Store: <https://apps.apple.com/pk/app/bankruptcy-pro/id6740400569>

Cross Connection — Religious social platform App — iOS & Android

- Flutter-based religious social networking platform featuring community groups, real-time group chat, social feed with posts, likes and comments, prayer-sharing functionality, and user-created communities. Built to foster engagement through faith-based discussions, prayer requests, and community interaction.

Published on:

- Google Play: <https://play.google.com/store/apps/details?id=com.cross.connection>
- App Store: <https://apps.apple.com/pk/app/x-connection/id6738661941>

Health Score Today — AI-Powered Health Tracking App — iOS & Android

- Flutter-based health and wellness app featuring personalized health scoring, AI-powered food recognition, calorie tracking, step monitoring, water intake tracking, and health analytics. Integrated REST APIs and Gemini AI to deliver actionable health insights and recommendations.

Published on:

- Google Play: <https://play.google.com/store/apps/details?id=com.healthscoretoday.app>
- App Store: <https://apps.apple.com/pk/app/health-score-today/id6760365325>

OTHER NOTABLE PROJECTS

Stop Pick — *Transport Management Suite* — iOS & Android

Took ownership of an existing Flutter-based transport platform and delivered new features, enhancements, and bug fixes across Manager, Driver, and Passenger applications. Improved real-time tracking, trip management, and overall app performance using Google Maps SDK, WebSocket, REST APIs, and Firebase for notification.

Mafi Mushkil — *On-Demand Home Services Platform*— iOS & Android

- Built responsive Flutter UI for a service marketplace enabling users to book electricians, carpenters, cleaners, and other professionals. Implemented Firebase Authentication, application navigation, and data-driven workflows using mock data in preparation for backend integration.

EDUCATION

BS, Computer Software Engineering — University of Engineering & Technology Peshawar | 2016 – 2020
